MYERS NURSERY & FRUIT FARM

Seymour, Ind.

Librarian,
U.S. Department of Agriculture,
Washington 25, D.C.

Dear Sir;

In regards to your request for my plant and price list of the past year, up to the present time I have not sent out any catalogues or price lists.

The new varieties listed below are sold to folks that have tried the fruit and seen it grow in my own orchard.

New varieties -

Orange Pear.- This fruit has the shape and near color of an orange when ripe. Tree very attractive, ripens Sept., non melting, canning, eating fresh.

Myers seedless persimmon.-This fruit ripens last of Sept. through Oct.; medium size, self fruitful, very hardy, never known to fail to set fruit. Bearing age between 3 and 5 years. Quality very good for puddings, freezing or fresh.

Peach, yellow gold,- This variety a cross of early Elberta, y and late Elberta r, very attractive oblong fruit with blush on one side, F.S. Quality fair, canning, shipping.

Peach, New Hale,- This fruit resembles the Hale variety except not quite so large, few days earlier, higher flavor when canned, somewhat smoother texture, very good. Eating, canning, freezing shipping.

Weeping Maple,- Very attractive tree for large lawns when topworked. Trees top worked on other maples, Acer Rubrum.

Grape, Red wonder,- This grape has proved to be a good variety for home gardens. Vines hardy, fruit large, very sweet, ripens earlier than Concord, fine for jelly.
